

Are Fellowes shredder bags biodegradable or recyclable?

Last Modified on 11/08/2018 3:12 pm CST

Fellowes shredder bags are made from 100% virgin resin and no recyclable material is used; however, they are 100% recyclable after use. Fellowes shredder bags are recyclable with a 04 plastic code. As a general rule plastics are not biodegradable.

We do suggest contacting your local waste management company for local recycling guidelines.
