

Can I shred labels in my Fellowes Paper Shredder?

Last Modified on 11/08/2018 3:30 pm CST

Unfortunately, no.

While some Fellowes shredders are capable of shredding staples, paper clips, credit cards or CD/DVD media, no Fellowes paper shredder is capable of safely destroying adhesive backed labels.

Using your shredder to destroy these types of documents can cause permanent and irreparable damage to your shredder, which would not be covered under the warranty on your unit.

Because the adhesives will build up on the cutters of the shredder, any item with adhesive backing is not recommended. Such items include, mailing labels, envelopes, stickers, post-its or any material that has a sticky or gummy backing.
