

I can't open the top cover on my Voyager 125, Venus 125 or Jupiter 125 laminator to utilize the Easy-Access to the laminator. How do I open this?

Last Modified on 12/20/2018 2:48 pm CST

More than likely the top cover locking screw is still in the unit. Please remove the screw located on the left side of the machine. The Venus 2 125 and Jupiter 2 125 are not designed to be opened.
