

# How do you clean laminator rollers?

Last Modified on 12/20/2018 3:13 pm CST

For best laminating results and to minimize / remove glue from the rollers, we recommend that a single cleaning sheet is used at the end of every laminating session before the laminator gets turned off.

Note - Sheets can be used several times before discarded.

Cleaning Sheets: 10 pack - Item # 5320603
