

Can I get additional columns/feet to increase the height of my 91712 Standard Monitor Riser?

Last Modified on 06/07/2022 10:55 am CDT

Unfortunately, no. Fellowes has tested the maximum height and weight distribution to ensure the safety of persons and equipment using this product.

Additional risers are not recommended, as injury or equipment damage could result.

We strongly discourage modifying the height over and above the original product design.
