

Troubleshooting LED light on Electron

Last Modified on 02/28/2019 4:00 pm CST

If the LED is not working:

The protective plastic film may be still covering the battery. To operate LED Guide:

- o Remove battery and cover
- o Remove plastic film
- o Reinsert battery and cover
- o If the LED Guide is still not operating call Fellowes® customer service

If the LED went out:

It's likely that the battery in the LED Guide is dead. Please try replacing the CR2032 battery located in the cutting carriage handle. To change the battery:

- o Slide the cutting carriage to one end, pull (swing) the handle up
 - o Turn the LED Guide I/O button to O
 - o Unscrew the battery cap with a coin or screwdriver (left turn opens, right turn closes cover).
 - o Remove the old battery and replace with a new CR2032 battery.
 - o Close battery cover.
 - o Turn the LED Guide I/O button to I
-
