

How much weight can the Lotus Sit Stands hold?

Last Modified on 01/31/2019 2:44 pm CST

The Lotus Sit Stand, Lotus DX and Lotus RT Sit Stands can hold up to 35lbs total; 30lbs on the top platform and 5lbs on the keyboard platform. We would not recommend using the product with less than 10lbs. You can adjust the tension with our patent-pending Smooth Lift Technology™ to offset the weight of your equipment and accessories (between 10 - 35lbs).

The Lotus VE will accommodate up to 25 lbs total: 20 lbs on the top platform and 5 lbs on the keyboard platform.
