Do I need a driver for my keyboard?

Last Modified on 04/12/2019 11:11 am CDT

The latest drivers are available via our web site for download. Please click on the link below to access and then type in your item number (CRC#) or locate your device on the drop down menu. If you are unable to locate your drivers or you are having difficulty downloading, please ask us for assistance. Click on the Ask a Question button above for one of our Technical Support Representatives to assist. .

Please note: All current USB compatible keyboards will install as plug-n-play using the default drivers provided with your Windows operating systems. Some of our keyboards do come with "software". The software is merely for the hot keys (typically additional keys on the top row) of the keyboard.

NOTE: Fellowes keyboard hot keys are not able to have custom programing, the software included with some keyboards merely allow the pre-set functions to work, should your computer not already contain the necessary drivers.
