

How long do my cables need to be to ensure the Levado can move freely?

Last Modified on 04/18/2019 10:23 am CDT

This will depend on your setup. If any of your cables are routing to the floor be sure that they can accommodate the full range of motion up to 48.5". Refer to Accessory Installation Step 1 in the instruction manual:

ACCESSORY INSTALLATION

STEP 1

Cable Management

- Position the cable tray in the center of the table towards the rear.
- Attach the cable tray using (4) M5 Phillips* round head screws. The open end should face the rear.
- Use the additional provided cable management as needed.
- Cables must not interfere with table operation.
- Cables must not interfere with the user.

*Phillips screwdriver must be at least 4" long to install the cable management
