

How do I fit my current table top onto the Levado base?

Last Modified on 04/18/2019 10:40 am CDT

You can use the VersaTop Clamps™ to install your current table top onto the Levado base. Ensure that the table top is 48"-72" wide x 24"-30" deep. Refer to install option 1 in the instruction manual.

STEP 3

Clamping base to table

- Slide clamps on each side of the table.
- On each clamp, tighten the (2) thumb screws until each click.
