

How long should the power cables be for items placed on Lotus Sit Stand (0007901, 0009901) or Lotus VE (8080101, 8082001)

Last Modified on 05/21/2019 11:47 am CDT

Most cable lengths are an average of 6.5ft, which should be sufficient for working when standing; however, it would be important to consider where the power sockets are located. The Lotus Sit Stand 0007901/0009901 raises 17" and the VE Sit Stand 8080101/8082001 raises 15" above the desk so to ensure proper cord length, you will want to have the Sit Stand at the highest position.
