

Why is the download speed slow when using the two rear UBS ports on my DX Lotus Sit Stand?

Last Modified on 06/07/2019 2:24 pm CDT

If you are using Windows 10, this is a known issue with all devices. The download speeds are significantly slow no matter what USB port you use (even directly into the computer). This is not an issue with the Lotus DX, but rather with Windows 10.
